

HELIOCONTROL®

HELIOS peripheral devices master system

HELIOControl is a Windows (from XP version onwards) based software platform to control, administrate and record all HELIOS dryers, HELIOS loaders and HELIOS discharging unites. All 3 software modules can be operated separately or all together. The peripheral devices are connected to a PC via CAN-Bus. Additionally, all the existing PCs can be operated synchronously with help of the company network (LAN).

HELIOwin

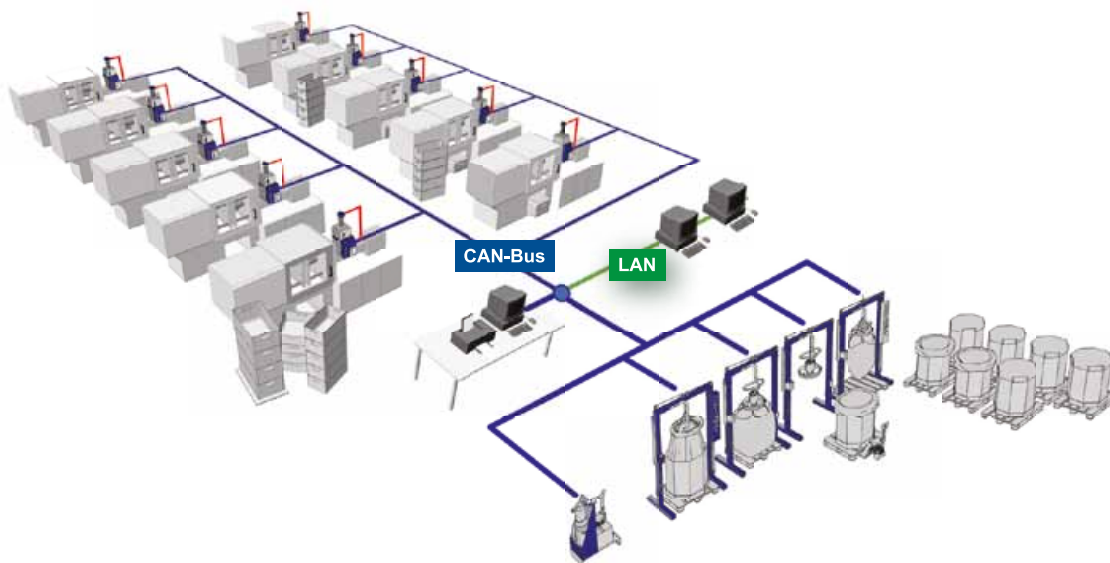

drying
software to control and record WINSsystem dryers

HELIOvac
